Dear Citizens of California:

California's 1983 annual report on traffic accidents bears both good and bad news. Encouraging is the fact that California's mileage death rate (deaths per 100 million miles of travel) has declined to an all-time record low. However, while we can be gratified for this decline in traffic-related deaths, the number of injuries suffered last year was higher.

Drivers under the influence of alcohol and drugs continue to pose a major threat on our state highways -- alcohol-caused accidents led to more injuries than in 1982. But tougher laws and better enforcement practices are beginning to pay off in lives saved. Last year, drunk drivers killed fewer innocent victims, although the number still remains far too high.

These figures tell us that we still have much to do to make our streets and highways safer. We must continue to focus public attention on this serious problem, for the cost of human suffering and loss is simply too high.

Meeting this challenge requires the concerted action of everyone. Better highways, tougher legislation, improved enforcement techniques and more safety education are all key components in this effort. Most importantly, it is the attitude and behavior of each and every motorist that ultimately make the difference.

This report should serve to reemphasize that traffic accidents can be reduced only if responsible driving behavior is increased. This is the most vital element in making our streets and highways safer. Through teamwork and greater cooperation among both private citizens and state agencies, we can continue to save lives.

Thank you for your help in achieving this important goal.

Most cordially,

George Deukmejian

PREFACE

This 1983 Annual Report of Fatal and Injury Motor Vehicle Traffic Accidents is compiled from motor vehicle traffic accident reports received from local police and sheriff jurisdictions and from California Highway Patrol Field offices. Presumably, all fatal and injury traffic accidents which occurred in California during 1983, are indicated in this report.

Property Damage Only (PDO) accidents are only included in Section 8. However, the degree of completeness is in question since not all agencies report all their PDO accidents. PDO statistics should be used as indicators of the volume of accident occurrences rather than exact statistics.

It should be noted that 1983 is the first year for SWITRS (Statewide Integrated Traffic Records System) to process all bicycle accidents, including those involving solo bicyclists. This addition to SWITRS may account for increases in bicycle involved accidents.

This report is prepared in accordance with Section 2408 of the California Vehicle Code. The cooperation of all traffic law enforcement agencies is greatly appreciated.

Copies of the report can be obtained from Staff Services Section, California Highway Patrol, Post Office Box 898, Sacramento, CA 95804, by payment of $3.50, which includes sales tax.

1983 CALIFORNIA QUICK ACCIDENT FACTS

There were 469,492 traffic accidents, 4,087 fatal, 196,394 injury, and 269,011 property damage only.

A traffic accident was reported every 1 minute 7 seconds.

One person was killed every 1 hour 55 minutes as a result of a traffic accident.

One person was injured every 1 minute 48 seconds as a result of a traffic accident.

Children under the age of 15 accounted for 34.0% of pedestrian victims and 43.8% of bicycle victims.

For each person killed there were 64 persons injured.

Speed was indicated as the Primary Collision Factor in 20.6% of the fatal and injury accidents.

In the last five years 1,480,456 persons have been killed and injured in California traffic accidents. This is an average of 296,091 per year. During the previous five year period, 1,352,188 persons were killed and injured for an average of 270,438 per year.

Of the licensed drivers in California, 32.4% were under 30 years of age; however, they comprise 48.2% of all drivers in fatal and injury accidents.

One out of every 5,507 persons living in California was killed in a traffic accident; one out of every 86 persons was injured; and one out of every 48 licensed drivers was involved in a fatal or injury traffic accident.

The 4,571 persons killed were the result of 4,087 fatal accidents for an average 1.1 deaths per fatal accident.

There were 2.5 persons killed and 160.1 persons injured for every 100 million vehicle miles of travel. (These are more commonly known as the mileage death and mileage injury rates.)

Hit-and-run was indicated in 8.7% of the fatal and injury accidents.

TEN YEAR SUMMARIES

In California, the mileage death rate has continued to decline from 2.7 in 1982 to 2.5 in 1983. This decline is comparable to the national death rates as well.

Fatal accidents are the lowest since 1976, while injury accidents have significantly increased since 1976.

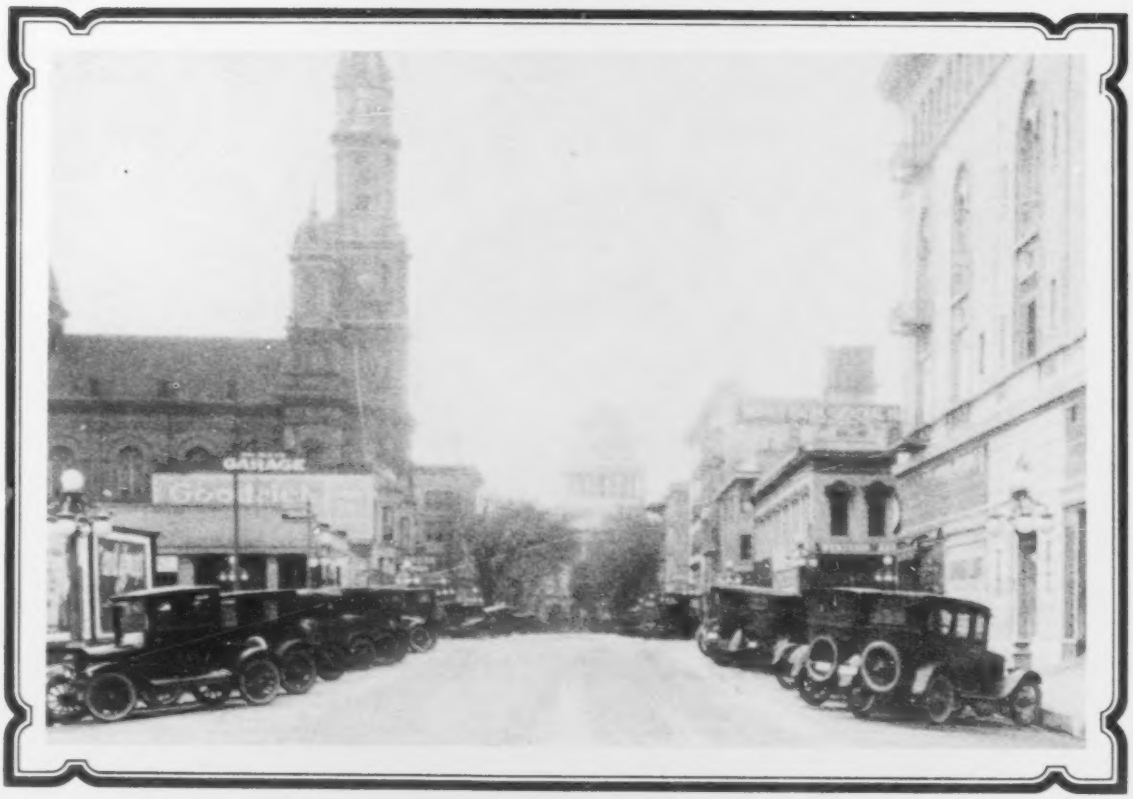
SECTION 2



TIME

In 1983 the greatest number of traffic deaths, 32, occurred on Saturday, May 14, and the lowest number of traffic deaths, 3, occurred on four dates: January 10, January 20, April 13 and July 13.

California still has not had a day without a traffic accident since March 11, 1968.

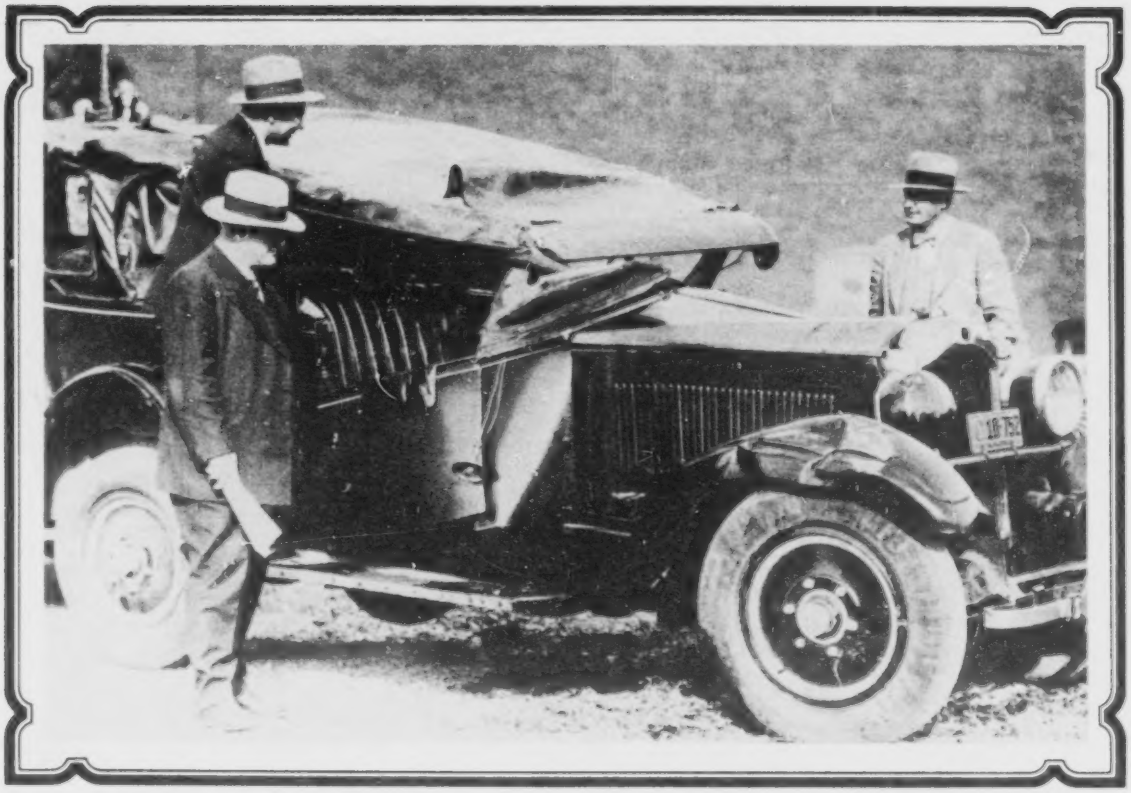
SECTION 5



ALCOHOL INVOLVED ACCIDENTS

Alcohol involved fatal accidents have declined 2.7% from last year. However, injury accidents where alcohol was a factor have increased 1.3% over last year.

Persons killed in alcohol involved accidents accounted for more than 50% of the persons killed in all motor vehicle traffic accidents.

Four new tables, 5n through 5q, are presented in this Section. They describe alcohol involved accidents and victims by county and month.

SECTION 7

SHORT SUBJECTS

This section consists of a conglomeration of various tables and topics which include: moped accidents, the primary collision factors of accidents, hit and run accidents, and a table covering over 50 years of statistical data.

During 1983 a new child passenger seat restraint law was enacted in California. It prohibits children under the age of four or weighing less than 40 pounds to be transported upon a highway in a motor vehicle without providing and properly using a child passenger seat restraint system. Because of the interest and concern this law has generated, a new table, 7d, was added to this section.
